

HI-FI SPEAKERS

La S.I.P.E. spa

Fondata nel 1967, la SIPE è l'ultima nata tra le fabbriche italiane di altoparlanti di un certo livello, ma si è rapidamente e progressivamente imposta sia in Italia che all'estero per la qualità dei suoi prodotti, le tecnologie impiegate e la serietà del servizio.

La Società Italiana Prodotti Elettroacustici ha oggi 200 dipendenti ed un capitale sociale di L. 1.125.000.000.

Gli investimenti nella ricerca sono stati sempre cospicui, tanto che ora l'ufficio tecnico può contare su due camere anechoiche (la più grande da 8 × 7 × 6 metri di spazio libero), una camera climatica e tre completi set di misura B&K.

La produzione

La SIPE, avendo sempre privilegiato la produzione di grandi tirature per grossi clienti industriali, non ha risentito della crisi attraversata dal mercato Hi-Fi in questo ultimo periodo.

Assicuratasi così una solida base produttiva, si è dedicata per anni allo studio di altoparlanti Hi-Fi per conto di aziende italiane ed estere (per esempio Chario ed Audio Pro), raccogliendo molte soddisfazioni.

La notevole esperienza acquisita con la progettazione e produzione di altoparlanti Hi-Fi è stata quindi applicata anche al settore TV, portando la SIPE ad un ruolo leader nella progettazione e produzione di sofisticati altoparlanti schermati per Hi-Fi TV, per le maggiori industrie europee.

L'elevato livello qualitativo di questi componenti è provato dalla preferenza che viene loro accordata nell'avanzatissimo mercato tedesco.

La SIPE spa produce tutte le parti in proprio, esclusi i magneti e le membrane, che preferisce acquistare presso le numerose aziende produttrici italiane ed estere.

La produzione è articolata nei settori Hi-Fi, TV, Car-Stereo ed Elettromusicali; il 40% è assorbito dal mercato nazionale ed il 60% dalla esportazione, prevalentemente nei paesi del MEC.

SIPE per autocostruttori ed installatori

La SIPE ha sempre rivolto grande attenzione anche alle esigenze degli autocostruttori, pubblicando, per prima in Italia, i parametri di Small degli altoparlanti anche sui cataloghi rivolti alla rete di vendita al dettaglio.

La continua espansione dell'attività, necessaria per mantenere una buona concorrenzialità in tutti i settori, ha condotto la SIPE a dedicarsi con notevole impegno anche al Car-Stereo, sia di primo (costruttori di auto) che di secondo equipaggiamento (aziende commerciali).

Visto il notevole successo conseguito, oggi la SIPE ha deciso di allargare la sua presenza in questo settore, distribuendo direttamente una serie di coassiali e subwoofer (dotati di filtro) con il suo marchio.

Quanto prima verrà presentato anche un catalogo per installatori di sistemi professionali, che conterrà altoparlanti fino ad oggi prodotti in esclusiva per clienti industriali.

MODEL X 300.1/6 Hi-Fi CROSSOVER NETWORK

ELECTRICAL CHARACTERISTICS:

NOMINAL IMPEDANCE: 8 Ohm
CROSSOVER FREQUENCY: 600/5000 Hz
POWER INPUT: 40 - 80 W

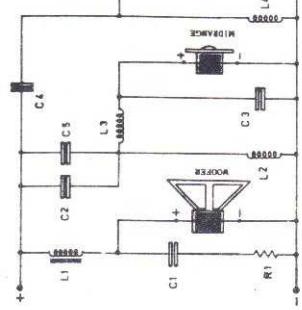

ELECTRICAL COMPONENTS:

L1= 2,5 mH
L2= 2 mH
L3= 0,55 mH
L4= 0,28 mH
C1= 4,7 μ F
C2= 22 μ F
C3= 10 μ F
C4= 3,3 μ F
R1= 4,7 ohm
R2= 3,9 ohm

RESISTIVE LOAD MEASUREMENTS:

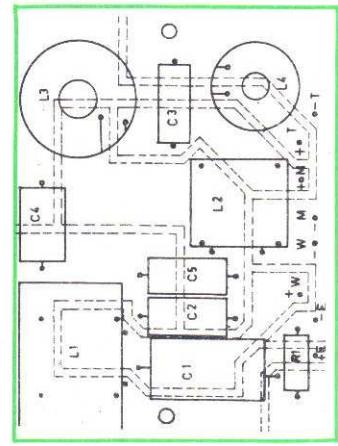

MODEL X 325/6 Hi-Fi CROSSOVER NETWORK

ELECTRICAL CHARACTERISTICS:

NOMINAL IMPEDANCE: 8 Ohm
CROSSOVER FREQUENCY: 500/3000 Hz
POWER INPUT: 60 - 120 W

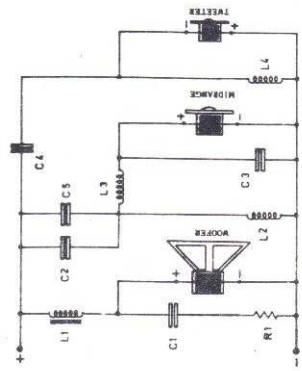

ELECTRICAL COMPONENTS:

L1= 3,3 mH
L2= 1,4 mH
L3= 0,55 mH
L4= 0,28 mH
C1= 68 μ F
C2= 15 μ F
C3= 6,8 μ F
C4= 5,2 μ F
C5= 15 μ F
R1= 0,68 ohm

MODEL X 248/6 Hi-Fi CROSSOVER NETWORK

ELECTRICAL CHARACTERISTICS:

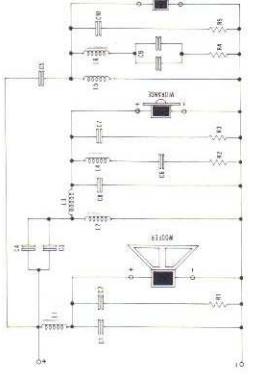

NOMINAL IMPEDANCE: 8 Ohm
CROSSOVER FREQUENCY: 500/3000 Hz
POWER INPUT: 50 - 100 W

ELECTRICAL COMPONENTS:

L1= 4,7 mH C9= 10 μ F
L2= 2,5 mH C10= 1,2 μ F
L3= 0,32 mH C11= 4,7 μ F
L4= 3,3 mH C12= 6,8 μ F
L5= 0,45 mH R1= 6,8 ohm
L6= 1,8 mH R2= 6,8 ohm
C1= 47 μ F R3= 6,8 ohm
C2= 33 μ F R4= 6,8 ohm
C3= 33 μ F R5= 6,8 ohm
C4= 4,7 μ F R6= 6,8 ohm
C5= 4,7 μ F R7= 6,8 ohm
C6= 33 μ F R8= 4,7 μ F

MODEL X 313/6 Hi-Fi CROSSOVER NETWORK

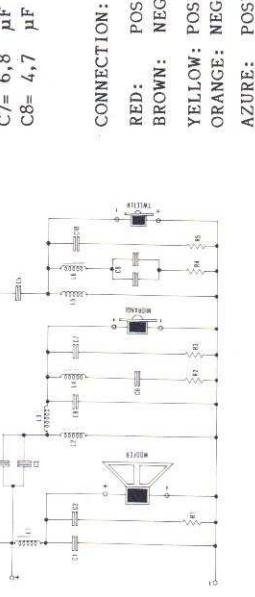

ELECTRICAL CHARACTERISTICS:

NOMINAL IMPEDANCE: 8 Ohm
CROSSOVER FREQUENCY: 500/3000 Hz
POWER INPUT: 80 - 160 W

ELECTRICAL COMPONENTS:

C9= 10 μ F L1= 3,3 mH
C10= 1,2 μ F L2= 2,5 mH
C11= 0,32 mH C12= 4,7 μ F
C1= 47 μ F R1= 6,8 ohm
L3= 0,32 mH R2= 6,8 ohm
L4= 3,3 mH R3= 6,8 ohm
L5= 0,45 mH R4= 6,8 ohm
L6= 1,8 mH R5= 6,8 ohm
C2= 33 μ F R6= 6,8 ohm
C3= 33 μ F R7= 6,8 ohm
C4= 4,7 μ F R8= 6,8 ohm
C5= 4,7 μ F R9= 6,8 ohm
C6= 33 μ F R10= 6,8 ohm
C7= 6,8 μ F R11= 6,8 ohm
C8= 4,7 μ F R12= 6,8 ohm
